## **DETAILED ACTION**

### ***Specification***

1. Claims 1-20 are objected to because of the following informalities:

The claims are objected to because the lines are crowded too closely together, making reading and entry of amendments difficult. Substitute claims with lines one and one-half or double spaced on good quality paper are required. See 37 CFR 1.52(b).

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1, 4, 6-9, 11-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Though the preamble states a computer network, the method of the claims does not positively recite use of the network or any technology in performing the steps. For example, a card catalog may be described as a database, the database may be hand searched, cards may be have information input to them and entered into the card catalog. It is therefore seen to be non-statutory.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3629

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 4-7, 11, 13-14, 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohrn (6,356,874).

As per Claim 1, 14.

Ohrn ('874) discloses:

providing a database, see figure 1;

inputting bed availability information for a plurality of healthcare facilities having beds, see column 6, lines 6-45, and column 10, lines 22-30;

providing a first access to the database for finding the bed availability information by a user of the database, see column 6, lines 6-45.

As per Claim 2.

Ohrn ('874) further discloses providing the database on a network, see figure 1.

As per Claim 4.

Ohrn ('874) further discloses contacting one of the healthcare facilities after retrieving information about the healthcare facility, see column 10, lines 22-30 and column 5, lines 37-45.

As per Claim 5.

Ohrn ('874) further discloses providing a remote server storing the database, see figure 1.

As per Claim 6.

Ohrn ('874) further discloses providing a second access to the database wherein an extended care or a healthcare facility having beds enters the bed availability into the database via the second access, see column 5, lines 37-41, column 7, lines 44-50 and column 10, lines 22-30.

As per Claim 7, 19.

Ohrn ('874) further discloses an individual healthcare facility accesses the database to input the bed availability information for the individual healthcare facility, see column 5, lines 37-41, column 7, lines 44-50 and column 10, lines 22-30.

As per Claim 11.

Ohrn ('874) further discloses searching the database for the bed availability information, see column 5, lines 37-63;

matching healthcare facility criteria with patient needs, see column 5, lines 37-41 and column 10, lines 22-30.

Art Unit: 3629

As per Claim 13, 20.

Ohrn ('874) further discloses a means for searching, see column 37-63.

As per Claim 17.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohrn (6,356,874) in view of Bruno et al (6,289,088).

As per Claim 3.

Ohrn ('874) does not specifically disclose the network is the internet.

Bruno et al ('088) teaches use of the internet as a less expensive alternative to long distance service, see column 5, lines 34-56.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to use the internet as a less expensive alternate network as taught by Bruno et al ('088) in the invention of Ohrn ('874).

As per Claim 10.

Ohrn ('874) further discloses an online form for accessing the database and inputting information, see figure 3.

5. Claims 8, 9, 12, 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohrn (6,356,874) in view of Stanis et al (4,135,241).

Art Unit: 3629

As per Claim 8, 15.

Ohrn ('874) does not specifically disclose bed availability includes a quantity of beds.

Stanis et al ('241) teaches a quantity of empty beds available, see column 7, line 43 – column 8, line 8 and column 3, lines 14-25 for the benefit of accurate billing and records management.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to include a quantity of beds available in the invention of Ohrn ('874) as taught by Stanis et al ('241) for the benefit of accurate billing and records management.

As per Claim 9, 16.
